Experience

Frontend Development *Link*
Freelancer *Nov 2024 – Mar 2025*

- Modified and optimized CSS components for Web3 website to ensure responsive layouts across devices.
- Customized the color palette and UI styles to align with the brand's theme and improve user experience.

Projects

PolyChat *Link*

- Built end-to-end language exchange platform where users create profiles with native/learning languages, send friend requests, and connect via instant messaging, voice, and video calls.
- Used Stream Chat, JWT auth, RESTful APIs, React + DaisyUI, and TanStack Query; backend optimized to support 1000+ interactions/hour.

Campus Outing System *Link*

- Developed a MERN stack outing request portal with role-based access control and organizational email authentication, allowing students to submit and track real-time outing requests.
- Implemented a secure caretaker dashboard to approve/reject/pending outing requests, leveraging JWT authentication, React.js UI, and MongoDB for scalable data management.

PCOS Disease Predicition *Link*

- Developed a web-based PCOS prediction app using a questionnaire-driven ML model to calculate probability based on user inputs and symptoms.
- Built with React.js and deployed on Vercel, integrating a trained Python ML model via API, delivering instant results through a clean, responsive UI.
